Scalable Cities – SCC1 Support

City-driven & People-driven

Agenda for today

+CITYXCHANGE

Agenda - Wednesday 4 October

9:00 - 9:30 **Registration, coffee, mingling & City Exhibition**

9:30 - 10:00 **Welcome & Project introduction** (*Annemie Wyckmans, Dirk Ahlers, NTNU*)

10:00 - 10:15 **Welcome from Trondheim**

10:15 - 11:15 **Introduction to +CityxChange results**

Dirk Ahlers (NTNU), Bjørn Ove Berthelsen (Trondheim kommune), Kieran Reeves (Limerick City & County Council), Miloš Prokýšek (Město Písek), Tudor Drambarean (Alba Iulia Municipality), Siim Meeliste (Municipality of Võru), Eftima Petkova (Municipality of Smolyan), Andy Bäcker (Sestao Berri)

Introduction of project achievements, the “How to PED Cookbook”, and highlights and results from each city

11:20 - 11:30 **Introduction to parallel sessions – What makes a PED?**

Introduction to session topics and how to divide into groups

11:30 - 11:40 **Grab a coffee + snack before organising in your selected group**

+CITYXCHANGE

Agenda - Wednesday 4 October

11:40 - 12:30 Parallel topic sessions – Discussions, Questions, Challenges

- **Creating connected communities:** Learning from experiences and results of community engagement
- **Energy Markets:** Discussion on technical details and energy flexibility markets, barriers and bumps along the way, successes & main learning
- **Strategy, Policy:** Bold City Vision and city strategies
- **Business Models, Scaling:** Finance & partnership models, PED income streams, scaling
- **Radical collaboration:** Transdisciplinary, participatory & co-creative – across sectors, disciplines, interests and geographies (New European Bauhaus)
- **Mobility:** eMaaS, V2X, shared mobility
- **Designing & Deploying integrated PEDs:** Integrated development approach, connecting systems, data, people
- **Local generation, building measures, feasibility studies:** Individual building & neighbourhood measures and preparation

12:30 - 14:00

Lunch & Exhibition of Cities' achievements

+CITYXCHANGE

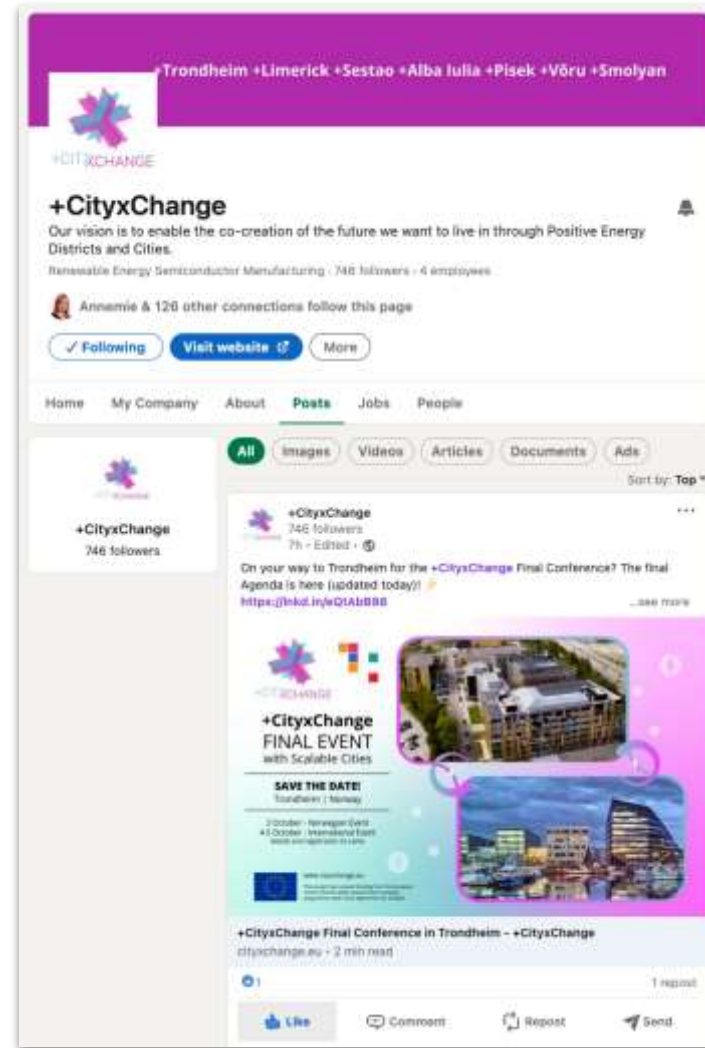

Agenda - Wednesday 4 October

- 14:00** **Buses leave for site visit**
- 14:15 - 15:15** **Site visit: The Brattøra PED**
- 15:15** **Buses back to Havet**
- 15:30 - 15:45** **Coffee and regroup & Exhibition**
- 15:45 - 16:45** **Passing on the torch of knowledge (Mission and Lighthouse Cities)**
Scaling and Replication Pathways towards Climate-Neutrality – From pilots to common practice.
Roundtables with facilitators
- 16:45 - 17:45** **Impact through small-scale actions inspired by Lighthouse Cities and Scalable Cities Action Grant**
- 17:45 - 18:00** **Wrap up & closing**
- 19:00 Dinner at K.U.K - Gubalari**, Kjøpmannsgata 38, 7011 Trondheim ([map](#))
<https://www.k-u-k.no/gubalari-restaurant/>

+CITYXCHANGE

Jørn Arve Flått

Leader of the Business development and Environment
Committee in the Trondheim City Council

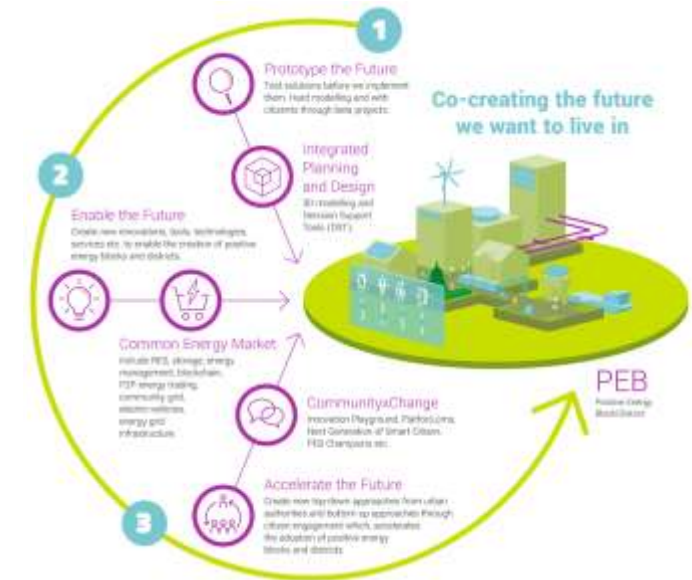

+CITYXCHANGE

Project Achievements

+CITYXCHANGE

Project Achievements

- Achievements across all 7 cities
 - 2 fully operational & integrated PEDs
 - 6 PEDs on their way
 - All Demo Projects applicable in at least 1 city
 - Good progress on KPIs and deployment
 - Setbacks shape new approaches
 - Adaptation of PED concept to different local contexts
 - PEDs driving local strategies & actions
 - Going beyond demonstrators
- Important step towards Climate-Neutrality

Project Learnings

- PEDs are possible in real-life settings
- Built through collaboration & co-creation
 - Integration, cross-sectoral, multi-disciplinary, multi-stakeholder
 - Activate local innovation ecosystem
 - Requires a mindset change
 - Frameworks, processes, systems
 - Co-benefits can surprise
- It takes effort & dedication & persistence & time
 - 5+ years of work by far over 350 people

Sharing Knowledge & Experience

- Deliverables, extra materials, scientific papers, solution booklets, webinars, glossary, cookbook, videos, learnings, conferences
- <https://cityxchange.eu/knowledge-base/>

+CITYXCHANGE HOME +CITYXCHANGE OUR CITIES DEMO PROJECTS RESOURCES WHAT'S NEW? CONTACT

Knowledge Base

This database is one of the central elements of our project website and includes all public deliverables and other kinds of downloadable information. It is structured in different categories (deliverables, articles, news updates, presentations, technical papers, ...) and is further organised and searchable through the use of content-based and geographical tags.

How to PED

The +CityxChange Cookbook

Experiences and guidelines on Positive Energy Districts

Recipes to make PEDs

This cookbook combines a number of recipes that combine to serve up a PED, when followed together with a committed range of stakeholders.

The recipes each focus on a different aspect of PED development. Collectively, they provide essential components for building PEDs, drawing on our experience from our demonstration projects and insights gained throughout the project. These recipes are organised into two categories: **procedural**, which outline the critical processes towards PED development, and **structural**, which detail the elements supporting the implementation and deployment of PEDs.

For each recipe, we offer a set of tips and tricks, factors for success, useful tools, and of course, a list of ingredients. We also reflect on the

different “flavours” – or key considerations – that are at the heart of successful recipes. These include **people**, **finance**, and **coordination**. Follow the **light blue**, **blue** and **green** lines for supplementary information that culminates at the end of the book!

As you read the cookbook, you’ll find that many of the recipes are interdependent or complementary to each other. Their contributions to building PEDs are context dependent and should be tweaked as necessary to achieve your desired outcome. This means that the recipes are not presented in a specific order here, but should be followed according to your specific situation.

City Achievements

Trondheim

Trondheim has been awarded the title of the most sustainable city in the world for the 10th year. The city has achieved this through a combination of factors, including its focus on green buildings, its commitment to renewable energy, and its focus on sustainable transport.

Key successes and achievements in Trondheim:

- A total of 11 green buildings (Mjøen and Bekken) have been awarded the title of 'Green Building' by the Norwegian Green Building Council (NGBU).
- The city has achieved a 100% share of renewable energy in its electricity production.
- The city has achieved a 100% share of renewable energy in its district heating production.
- The city has achieved a 100% share of renewable energy in its public transport.
- The city has achieved a 100% share of renewable energy in its public transport.

Limerick

Limerick has been awarded the title of the most sustainable city in the world for the 10th year. The city has achieved this through a combination of factors, including its focus on green buildings, its commitment to renewable energy, and its focus on sustainable transport.

Key successes and achievements in Limerick:

- The city has achieved a 100% share of renewable energy in its electricity production.
- The city has achieved a 100% share of renewable energy in its district heating production.
- The city has achieved a 100% share of renewable energy in its public transport.
- The city has achieved a 100% share of renewable energy in its public transport.

Alba Iulia

Alba Iulia has been awarded the title of the most sustainable city in the world for the 10th year. The city has achieved this through a combination of factors, including its focus on green buildings, its commitment to renewable energy, and its focus on sustainable transport.

Key successes and achievements in Alba Iulia:

- The city has achieved a 100% share of renewable energy in its electricity production.
- The city has achieved a 100% share of renewable energy in its district heating production.
- The city has achieved a 100% share of renewable energy in its public transport.
- The city has achieved a 100% share of renewable energy in its public transport.

Pisek

Pisek has been awarded the title of the most sustainable city in the world for the 10th year. The city has achieved this through a combination of factors, including its focus on green buildings, its commitment to renewable energy, and its focus on sustainable transport.

Key successes and achievements in Pisek:

- The city has achieved a 100% share of renewable energy in its electricity production.
- The city has achieved a 100% share of renewable energy in its district heating production.
- The city has achieved a 100% share of renewable energy in its public transport.
- The city has achieved a 100% share of renewable energy in its public transport.

Sestao

Sestao has been awarded the title of the most sustainable city in the world for the 10th year. The city has achieved this through a combination of factors, including its focus on green buildings, its commitment to renewable energy, and its focus on sustainable transport.

Key successes and achievements in Sestao:

- The city has achieved a 100% share of renewable energy in its electricity production.
- The city has achieved a 100% share of renewable energy in its district heating production.
- The city has achieved a 100% share of renewable energy in its public transport.
- The city has achieved a 100% share of renewable energy in its public transport.

Smolyan

Smolyan has been awarded the title of the most sustainable city in the world for the 10th year. The city has achieved this through a combination of factors, including its focus on green buildings, its commitment to renewable energy, and its focus on sustainable transport.

Key successes and achievements in Smolyan:

- The city has achieved a 100% share of renewable energy in its electricity production.
- The city has achieved a 100% share of renewable energy in its district heating production.
- The city has achieved a 100% share of renewable energy in its public transport.
- The city has achieved a 100% share of renewable energy in its public transport.

Võru

Võru has been awarded the title of the most sustainable city in the world for the 10th year. The city has achieved this through a combination of factors, including its focus on green buildings, its commitment to renewable energy, and its focus on sustainable transport.

Key successes and achievements in Võru:

- The city has achieved a 100% share of renewable energy in its electricity production.
- The city has achieved a 100% share of renewable energy in its district heating production.
- The city has achieved a 100% share of renewable energy in its public transport.
- The city has achieved a 100% share of renewable energy in its public transport.

“A PED is a process, not a product”

+CITYXCHANGE

The Future of PEDs?
One tool to accelerate the journey to
climate-neutral and liveable cities!

+CITYXCHANGE

Positive Energy Champions

Cathie Chappell

"I drive an electric car, but feel unable at present to make longer journeys due to the lack of charging points. I would like to monitor this, and hopefully see an improvement in this infrastructure."

Aoife McKean

"I hope to encourage impactful individual change with the aim of raising awareness about the aim to become a Smart City."

Jennifer Tiernay - Cityxchange Teams

"I am eager to show the journey of my transition to an electric car and all it involves and hope that by doing so I can inspire people in a similar position so that they can make the change."

Bill Kelly - Community Power

"Our project 'Greening the Grid' aims to engage the citizens of Limerick City to become actively involved in the energy transition."

Grainne McInerney

"I aim to improve the energy usage in the Georgian quarter in a realistic way that is sustainable and economically feasible."

Arnie Cronin - Limerick Cycle Bus

"We aim to highlight the need for safe segregated connected infrastructure for cyclists of all ages in Limerick."

Andrew O'Connell - St. Michael's Rowing Club

"There is huge potential for St. Michael's in harnessing the river to power our benches and the clubhouse in a clean and sustainable way."

David O'Connell - Facilities Manager Limerick City and County Council

"Over the next 20 weeks, I plan to work with the +Cityxchange team to incorporate their knowledge into the management of Council buildings by implementing some positive energy actions."

Slobhan O'Reilly - Limerick City Gallery of Art

"We are working with +Cityxchange partners Integrated Environmental Solutions (IES), using their modelling platform to get a better understanding of how the building uses energy."

Patricia Roberts - No.1 Pery Square

"I hope to reduce business energy costs and to demonstrate the positive effect of the reduction on the environment to employees and customers."

Mark Manning - Smart Systems

"We hope to lower the energy costs associated with the building by monitoring the energy usage of the building and its constituent parts."

Uea Walsh

"My plan as a Positive Energy Champion is to Empower Communities."

Neil Ward - Peter McVerry Trust

"We hope to identify and implement actions and changes that will help us to provide and manage more energy efficient homes, that is turn support cost effective living for our tenants."

Tom Spillane

"I will be examining the current transport system that exists within Limerick, and trying to mould new forms of active transport into the system."

+CITYXCHANGE

Issues Still Remain

- Business case for the establishment of a Community Grid requires large number of Prosumers.
- Reluctance to do deep retrofitting Regulations still not in place to support Community Grid and REC.

A lot of Ingredients are in place

Source: Getty Images/iStockphoto

- Understand the technical issues of retrofitting and installing renewables.
- We are addressing the finance.
- We understand the energy system and have solutions to provide flexibility.
- We have a source of renewable energy and have developed an innovative way to harness it.

+CITYXCHANGE

Limerick is ahead of the other cities in Ireland and is ready

+CITYXCHANGE

October 4th 2023 - and we did it

Demonstration District: Knowledge Axis (City Centre area)

Demonstration areas:

Brattøra - physical PEB / Local Energy Market

Campus Gløshaugen - microgrid modelling

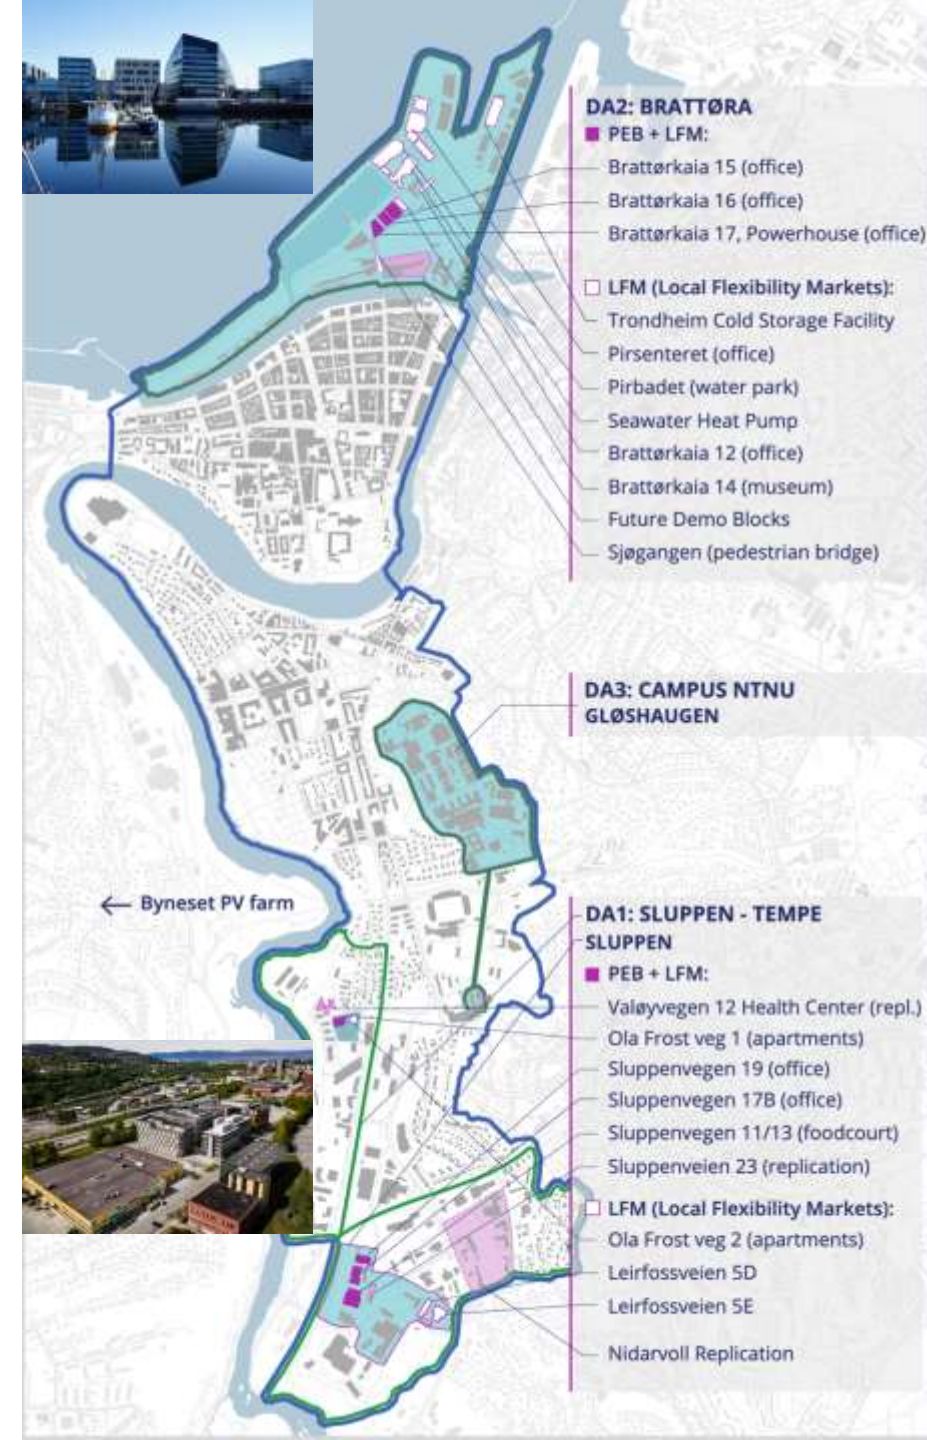

Sluppen - virtual PEB / Local Energy Market w/sector coupling

All Citizen Observatories (6) and Innovation Playgrounds (11) are localised within the Demo District system borders

Demo District and Demo Area Sluppen 3D modelled by IESRD and using the IES DST (Decision Support Tool)

+CITYXCHANGE

KPI impact achievements

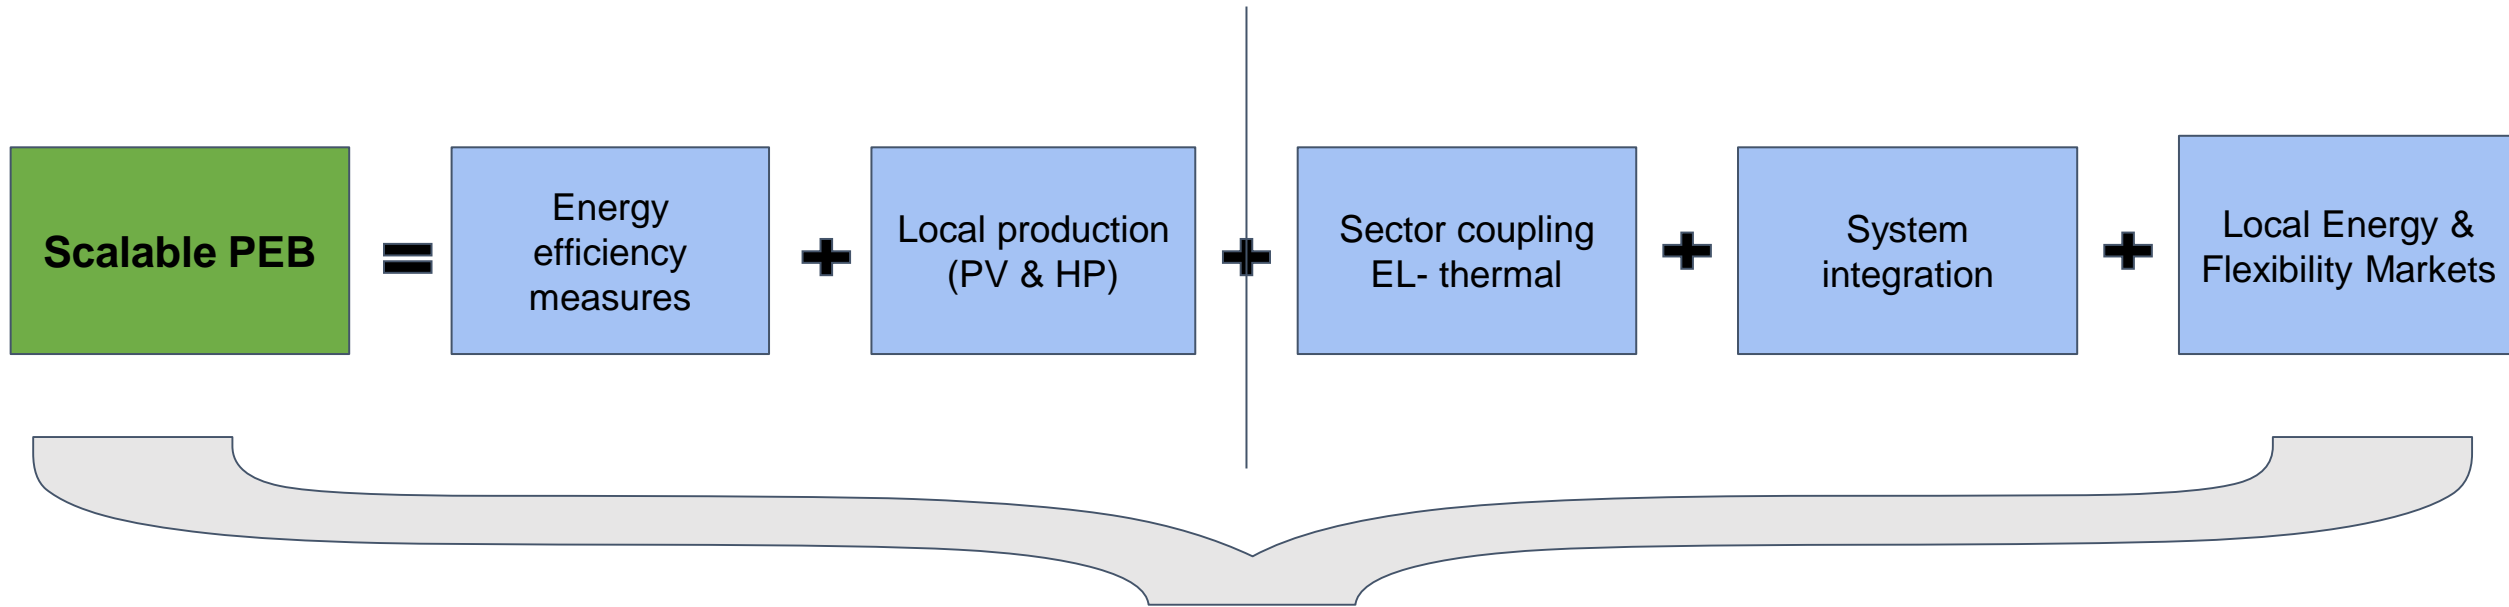

- 29 of the 33 project KPIs valid for Trondheim
- (+)100% goal achievement obtained for 19 KPIs (66%)

Most difficult KPIs: CO₂ emission reduction (28%) and transfer to eMaaS (13%)

Best: DER capacity traded: 743%!

The Trondheim PED recipe

- Stakeholder engagement and involvement in a quadruple helix approach
- Shift from cost focus to value creation focus

Note: The LHC Trondheim PEDs as implemented comprise commercial/public buildings

BCV framework - operational enabler for central city plans

Bold City Vision Framework (Framework for sustainable societal transition):

	Engage	Design	Activate	Accelerate	Support
Standardize	Evaluate	Visualize	Simulate	Finance	Share
Develop policies	Review	Revise	Plan	Budget	Analyze
Establish innovation partnerships	Make appointments	Link together	Collaborate	Prioritize	Manage the portfolio
Change the organization	Identify	Lead	Support the intrapreneurs	Make room for self-organisation	Twin
Involve the citizens	Acknowledge	Deliberate	Localize	Connect	Amplify
Develop projects	Pitch	Create prototypes	Deliver	Capitalize	Tell stories

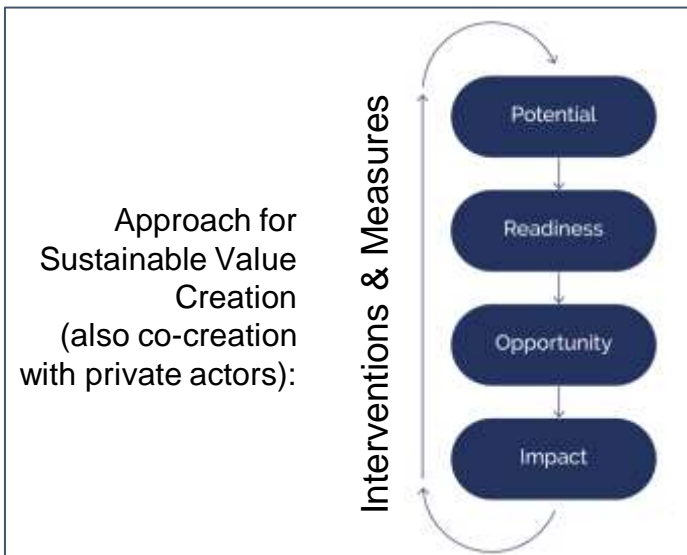

Trondheim Societal Master Plan '20-'32

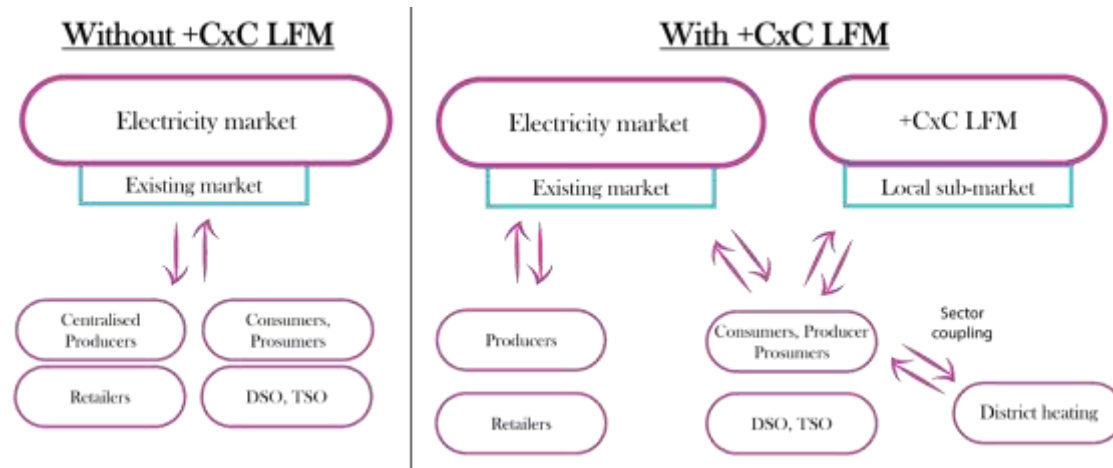

Example on Trondheim plans and strategies

- Energy / Climate plan
- Sustainable Value Creation Action Plan
- Regional Value Creation Strategy
-

Operationalisation

Aneo Local Energy & Flexibility Market

Participants that trades in the existing (“global”) electricity market can participate in the new +CxC LFM

The +CxC LFM consists of both a flexibility and an energy market module.

Challenges/Lessons learned

- Anchoring at CEO/adm. leader group level
- Organising
- A variety of different corporate cultures - acceptance
- The devil is in the details, but also in your numbers
- From cost focus to value creation potential
- Energy legislation

+Písek

Czech Republic

+CITYXCHANGE

We started with expectations...

- +CxC is about energy trading.
- +CxC helps municipality to improve energy management.
- PEB is only a technical issue.
- Legislations is about to be updated in CZ.
- The situation in Czech republic is different from EU.

What we learned

- Change starts with you.
- If you want to change your city, you need to start with your municipality.
- PEB is all about the people who live and work there
- Even a small step is progress.
- There are progressive people around you, just give them time to show up.
- We face the same challenges.
- +CityxChange is always a few years ahead.

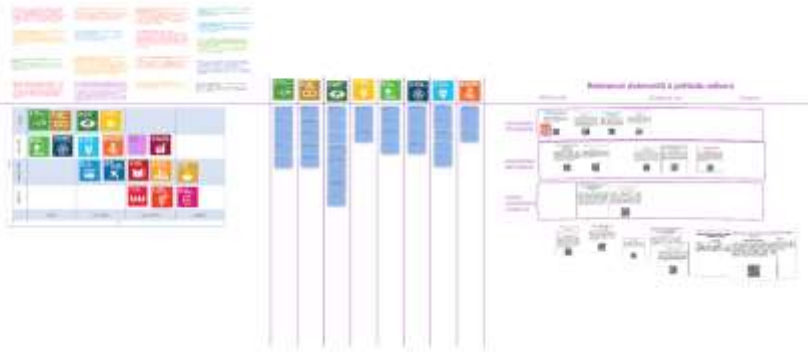

What have we achieved?

SESTAOBERRI

+CITYXCHANGE

Key outcomes:

- Expect to have DA1 become a working PEB by March 2026
- Accelerate municipal 55% GHG reduction goal from 2030 to 2026
- Start sustainable wikipedia project with potential to create large scale positive impact at international level

Challenges:

- Funding full retrofit (10M€) for Escuela de Aprendices building
- Bureaucracy
- Lack of sense of climatic urgency

Lessons learned:

- Aim for the stars if you want to, at least, land on the moon
- Luck/serendipity always plays a major role. But, “the harder one works, the more chances for luck that one gets”, tends to hold true

+Alba Iulia

Romania

+CITYXCHANGE

Alba Iulia towards Net Zero City

Alba Iulia Municipality as a Follower City in the +CityxChange project benefited from all the learnings and knowledge transfer within project activities. Many developments have occurred during CxC project in the area of energy efficiency, mobility and smart city tools, enabling the city to develop new forms of visioning, governance, and innovation.

+CITYXCHANGE

Alba Iulia towards Net Zero City

Alba Iulia towards Net Zero City

Secured funding for improving energy efficiency at the Olympic swimming pool and the Home for the elderly

+CITYXCHANGE

Alba Iulia towards Net Zero City

Pilot project: *Improving energy efficiency and consumer behavior in social housing in Alba Iulia*

Informative materials regarding energy consumption, invoices and associated costs.

Smart home system in order to offer real time data and automation.

Comparison with historical data for quantifying possible energy reductions after applying such measures.

Propose improvements in regional financing guides and programs, in order to include such activities and measures in current calls for energy efficiency.

Alba Iulia towards Net Zero City

**Secured funding for 1 MW
PV park and 5 other
municipal buildings -
development in 2023**

+CITYXCHANGE

Alba Iulia towards Net Zero City

Expansion of projects worth over 60 million Euros in the areas of the PEB regarding mobility (building dedicated buses and bike lanes, acquiring electric busses, installing car and bus chargers), public lighting, and energy efficiency of buildings (geothermal energy for elderly centre, solar energy for Olympic swimming pool);

Alba Iulia towards Net Zero City

Hosting of the first Climathon edition at a city level with a number of different outreach activities and innovative forms of communication, to highlight the importance of climate neutrality to different stakeholder groups in the city;

+CITYXCHANGE

Alba Iulia towards Net Zero City

During +CityxChange, Alba Iulia became a signatory of the Green Cities Accord and was awarded the Sustainable Communities Award by the Swiss Embassy in Romania

+CITYXCHANGE

+Smolyan

Bulgaria

+CITYXCHANGE

Creating Positive Smolyan

Through the project, with the NTNU support, **secured funding** for the **development** of a **PEB** consisting of the City Swimming Pool and the Sports hall.

+CITYXCHANGE

Creating Positive Smolyan

Embracing the concept of PEB and **creating PED** in city centre with the support from the **EUCF**

Creating Positive Smolyan

Promoting PEB through citizen engagement and training energy champions from the local community

+CITYXCHANGE

Creating Positive Smolyan

Developing a vision for **green, innovative and hospitable Smolyan 2050**

Transition to Low-carbon Economy

Development of Sustainable City Mobility

**Bold City Vision
Smolyan 2050**

Development of Sustainable Tourism

Development of Sustainable Urban Environment

Citizen Engagement

+CITYXCHANGE

Creating Positive Smolyan

Next Generation Smart Citizen

+CITYXCHANGE

Creating Positive Smolyan

Key outcomes:

Opening up for new partnerships and bolder approach when applying to new programs;
Change in the mindset towards more green and sustainable future
Investing more time and effort in the involvement of the young people of the city

Challenges:

Retrofitting the buildings to achieve PEB
Finding the right people
Funding large scale projects

Lessons learned:

Citizens as partners in the building of the city's future
The importance of the long term vision and the tools you need to achieve it

+Võru

Estonia

+CITYXCHANGE

+CityxChange footprints in Võru

Reconstructed actual buildings and **increased** organisational capacity (people, software, and processes)

+CITYXCHANGE

+CityxChange footprints in Võru

Longer **foresight up to 2050** and a principal vision how to move forward

+CityxChange footprints in Võru

Courage and knowledge to tackle complex issues and build **new valuable partnerships** (Taltech, BUILDEST)

+CITYXCHANGE

+CityxChange footprints in Võru

Local partnerships and exchange and international partnerships and exchange leading to a regional SECAP

+CITYXCHANGE

Challenges

Internal communication of projects' and activities' goals

Finding the right people

Lessons learned

Long-term visioning, energy efficiency and sustainability -it is a mindset

Split THE CHALLENGE into smaller bits and go for it!

October 5th

+CITYXCHANGE

+CITYXCHANGE

Limerick · Trondheim · Alba Iulia · Písek · Sestao · Smolyan · Võru

Welcome!

+CityxChange Final Conference
“The Future of Positive Energy Districts”
Trondheim, October 2023

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No 824260.

Our Location Today

+CITYXCHANGE

kjeldsberg

Levende samfunn
For og av mennesker

[Sluppen, view of Lager 11. Photo by Trondheim kommune]

Agenda for today

+CITYXCHANGE

Agenda - Thursday October 5th

9:15 - 9:45

Coffee & mingling

9:45 - 10:00

Welcome and intro to Sluppen PED, recap from previous day

(Dirk Ahlers, Annemie Wyckmans, NTNU; R.Kjeldsberg)

10:00 - 11:30

Roundtables

Beyond +CityxChange & SCC1 – Collaborations towards climate-neutrality –

- Contributions from visiting projects
- Challenges from the visiting cities of the SCALE travel grant
- Cross cutting projects
- Upcoming calls/events/projects
- Brainstorm on possible collaborations
- Summary of roundtables

11:30 - 13:00

Lunch at Lager 11

(Optional visit to the Bryte flow battery in the basement at 12:00, limited to 3*15 people with technical interest. Details at the event.)

+CITYXCHANGE

Agenda - Thursday October 5th

13:30 - 14:15 Site visit: The Sluppen PED

Tour of PED: Overall area, Lager 11, Lysgården, SV 23, battery, car chargers & fleet. Multiple tour guides with different focus topics

14:15 - 14:30 Coffee break

14:30 - 16:00 “Get involved” session: Replication of solutions & processes

We want to share stories of how our cities replicated/implemented specific solutions, focussing on the process rather than only the end result.

+CityxChange Stories:

- Bold City Vision, Smolyan. *Eftima Petkova (City of Smolyan)*
- Local Energy Market, Trondheim. *Mette Rostad (Aneo)*
- eMobility, Trondheim. *Tom Jensen (Trondheim kommune)*
- Citizen Innovation Lab, Limerick. *Helena Fitzgerald (UL)*
- Modelling, Limerick. *Ruth Kerrigan (IES)*
- Finance, Sestao. *Andy Bäcker (Sestao)*
- Citizen engagement, Písek. *Milos Prokysek (Písek municipality)*
- Towards a PED, Võru. *Siim Meeliste (Võru municipality)*

Agenda - Thursday October 5

16:00 - 16.15 Closing session

16:15 Transport back to city centre via bus, or you can make your own way back

Optional: Free time / staying for a drink at Lager 11 or Austmann Brewery ([map](#))

17:30 Optional City Walking Tour – leaving at Scandic Nidelven, ending at dinner
Signup during the day, places limited. Depending on the weather on the day.

16:30 - 17:45 BoC Meeting (for SCC1 project coordinators and interested cities/projects)
(location Bøker&Bylab) (Separate agenda is sent for BoC members.)

19:00 Closing Dinner

Doors open at 18:30 & mingling

Archbishop's Palace (Erkebispegarden), Kongsgårdsgata 1, 7013 Trondheim ([map](#))

City Lab

Smart City Strategy Development

- Adaptation of m:ci methodology (indicators & action fields)
- Data collection and analysis
Elaboration of City Profiles: Opportunities and challenges
- Co-creation of project ideas with local experts
- Selection of two projects per city
Innovation workshop for validating and further development

★
City Implementation Plans in all Fellow Cities

Project Development

Guided step by step process to implementation

- 8-sp process has been used and is used to support the cities:
- Definition and assessment of the solution and functionalities.
- Feasibility analysis, implementation planning and securing of funding.
- Call for tender, planning monitoring, evaluation, and reporting of impacts.

★
At least two projects implemented in each Fellow City on Energy and Mobility

Market Consultation

Improve procurement by engaging with the market

- Digital tool enabling cities to:
- Reach out to European network of innovative suppliers and to sort it by the solutions they offer
- Create an Invitation for Market Consultation
- Publish invitation, invite relevant companies

★
Better procurement of innovative solutions with early-stage engagement with suppliers

Upscaling

Guided process to upscale demos in Lighthouse Cities

- Adaptation of the Project Development task to the LHCs to upscale one of their interventions.
- Selection of one use case implemented during SPARCS to be a lighthouse project and continue with the legacy of SPARCS.
- Support cities in all the process of upscaling (scoping, engagement, feasibility, financing).

★
At least one project per LHC is upscaled during SPARCS

Knowledge Exchange and Training

City Forums, Webinars, Workshops, LHC demo site visits, Smart City Training

STARDUST

Scalable Cities: Visitor Cities Grant

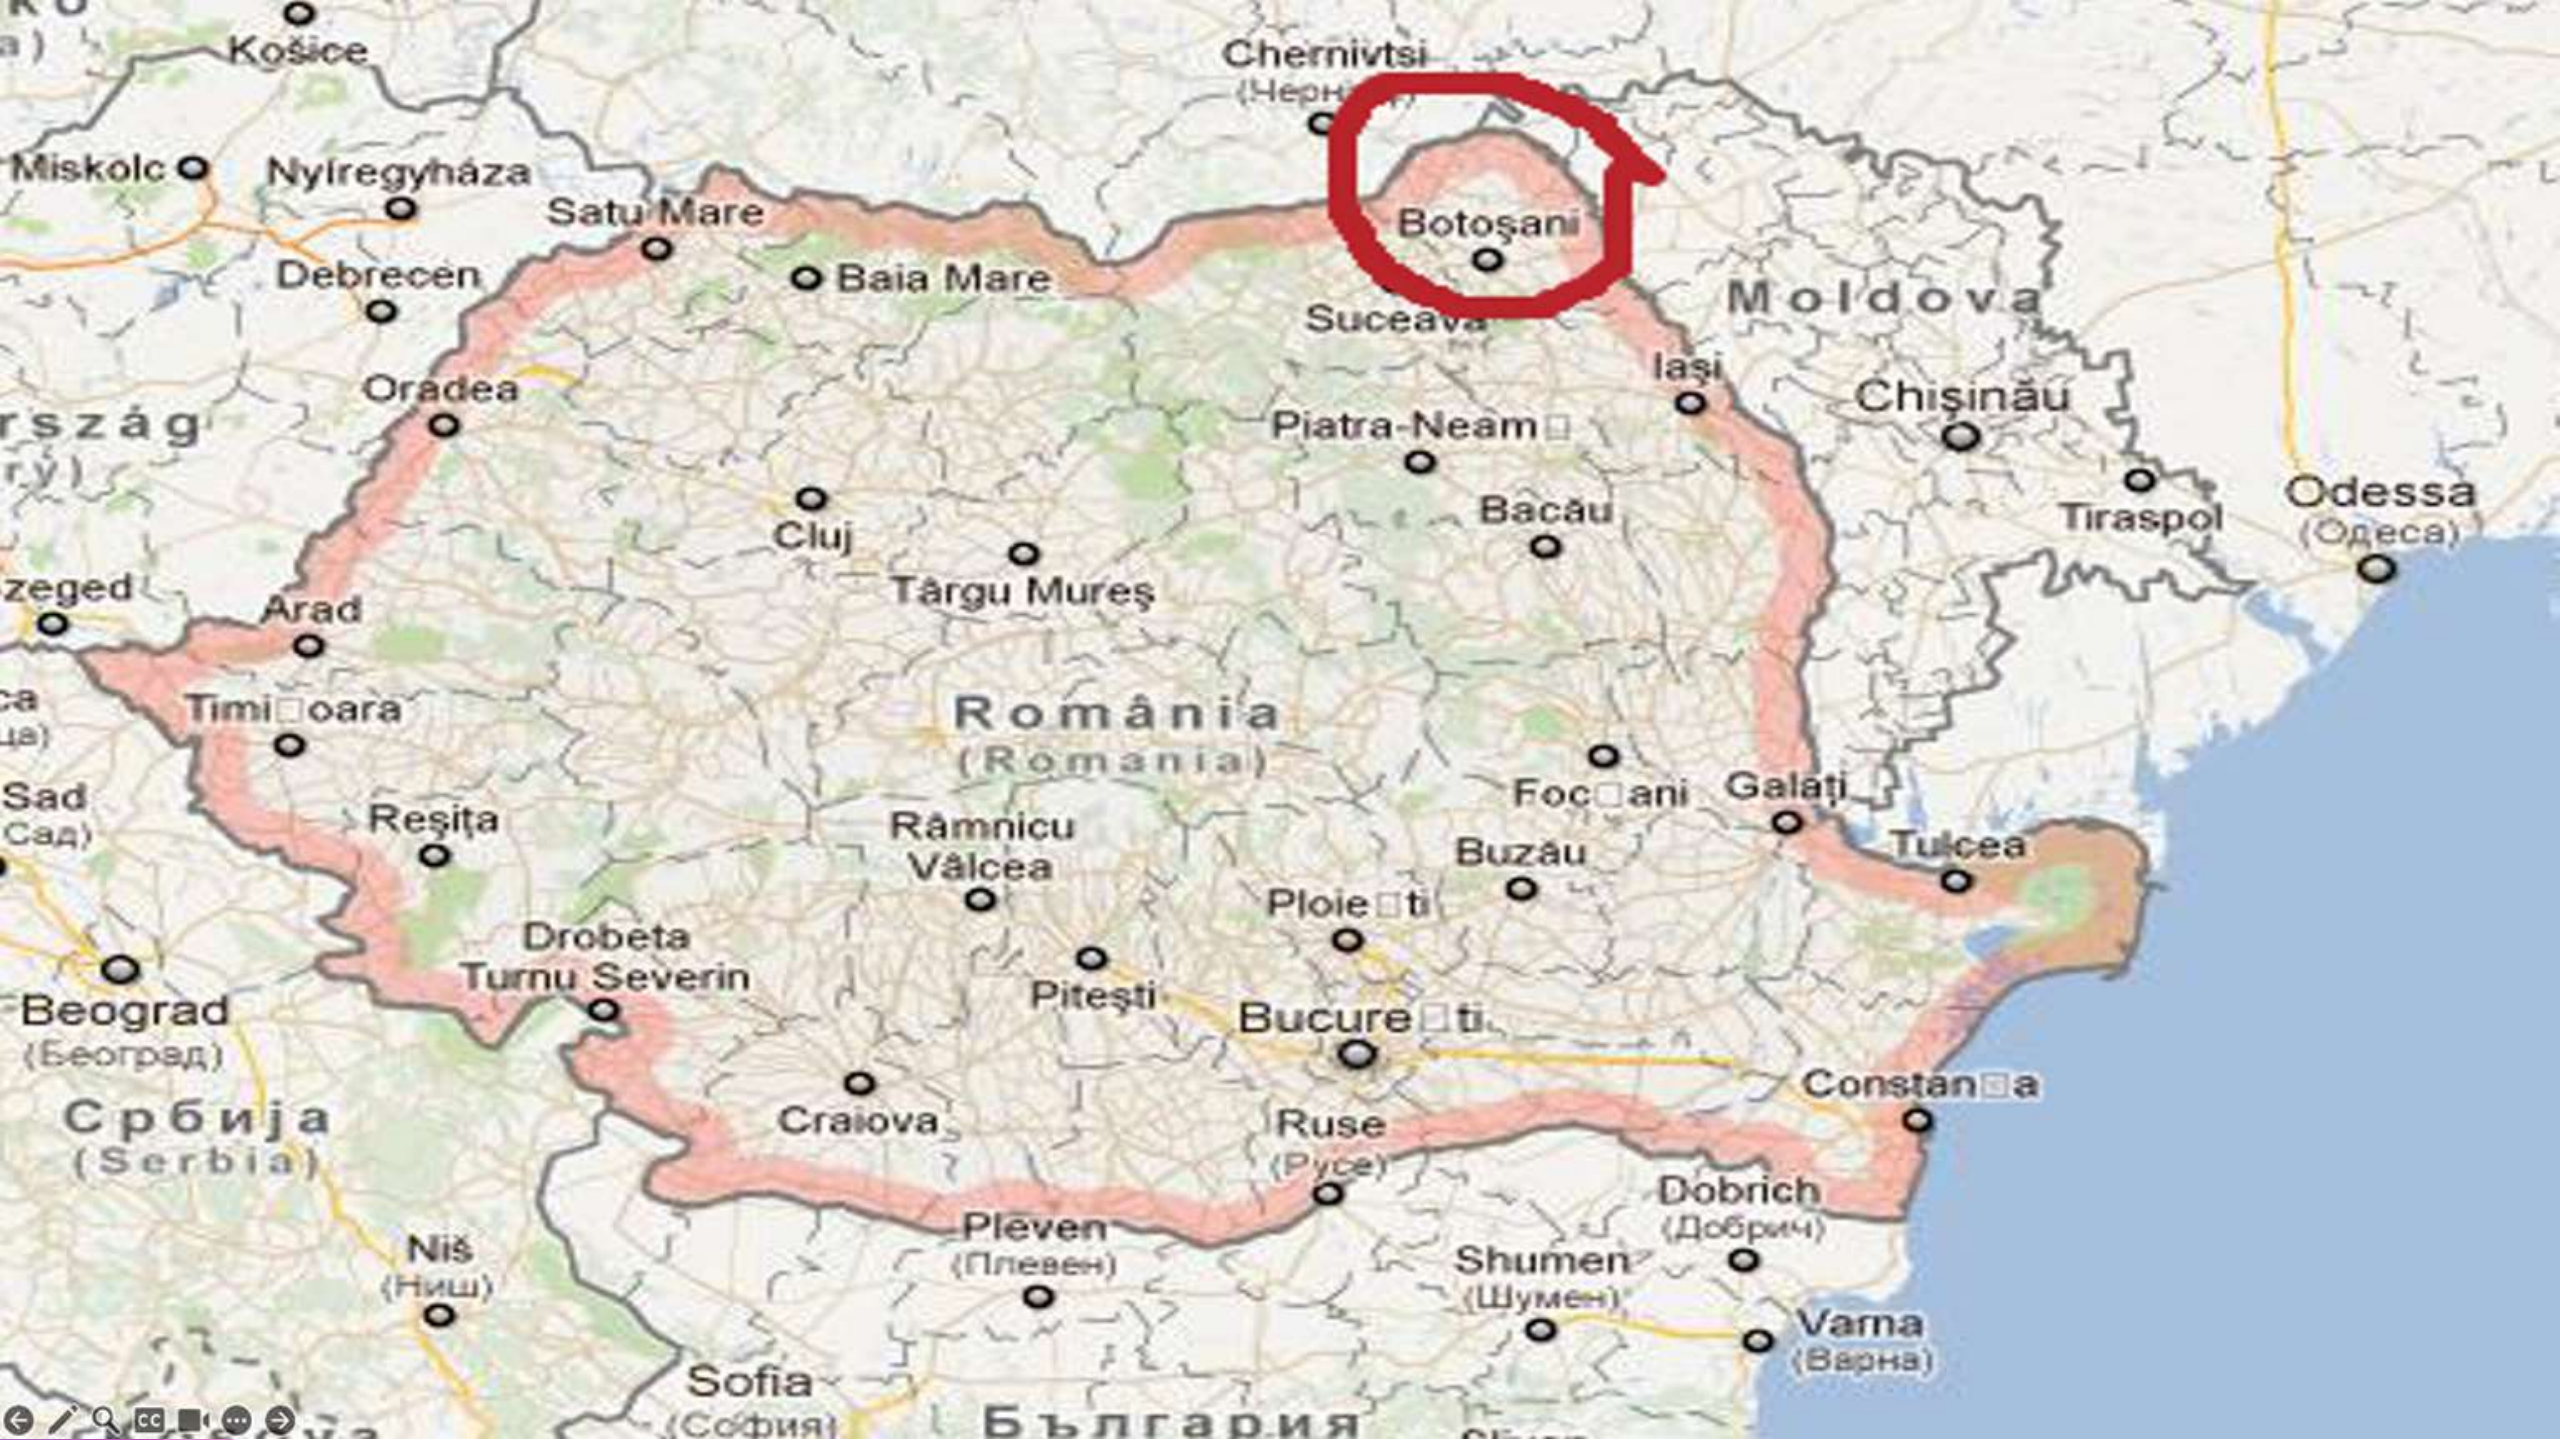

Challenges and questions from:

- Botosani
- Cesena
- Kladno
- Milan
- Pula
- Rzeszów
- Udine

BOTOȘANI

The Smart City to be

Botoșani

România
(Romania)

Moldova

Србија
(Serbia)

България

The Smart City to be

- **SHORT PRESENTATION OF THE CITY:** Botoșani is the capital city of Botosani County, situated in the Northeast of Romania. It was first mentioned in The Chronicles of Moldavia, covering the history of the region from 1359 to 1594. Being placed at the junction of several commercial roads the city was initially a market town; in the 16th century, it already had "the biggest and the oldest fair of Moldavia". Large communities of Jewish and Armenian traders were present in this city starting with the 17th century.
- **POPULATION:** According to the 2011 census, Botoșani has a population of 106,847 inhabitants.

CONTEXT

Located within **Emilia-Romagna region**

Hosts around **97.000 inhabitants**

Leader of **Savio Valley Municipalities**

INITIATIVES

PED-RELATED PROJECTS

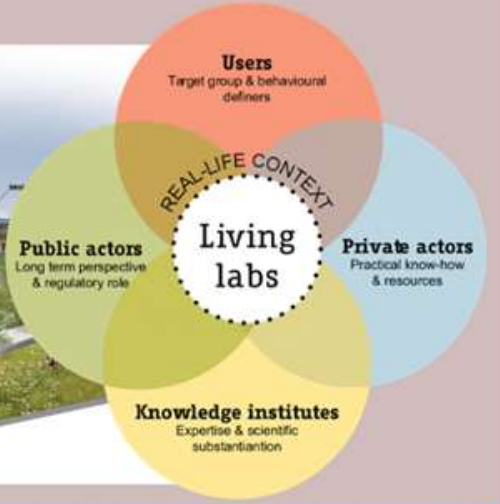

MAIN CHALLENGES

Regeneration of the built environment
buildings renovation, energy efficiency, flexibility and production;

Energy Community as a possible step toward PED model
community engagement, technical-economic affordability;

Intermodal mobility system
shift of mobility habits, mainly fostering walkability and cyclability;

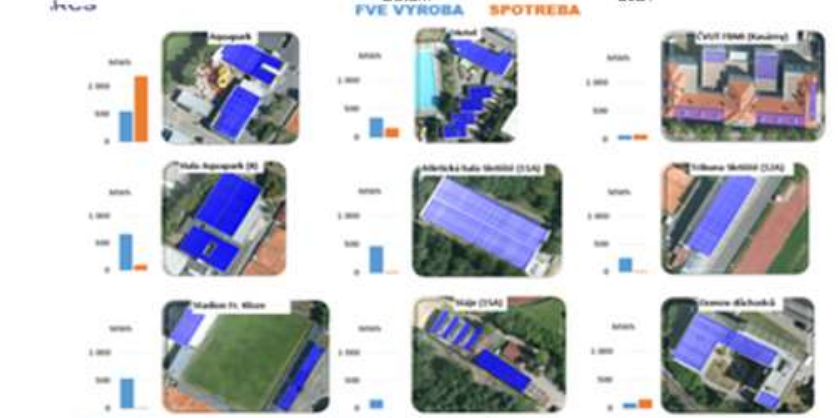

Climate-adaptive, accessible and liveable open public spaces
Urban Heat Island mitigation and heavy rainfall events management.

Positive Energy District

SPARCS - PED Šestitérské náměstí, let

Challenges and solutions ...

Challenges - PED

- Complexity.
- Partnership (incl. city leaders' motivation)
- **Positivity – how to approach it**
- **Volatile environment** – legal perspective (market, prices, EU policy) and development plans of the city (new constructions)
- Business models and funding

Challenges – Energy Communities

- Legislation / Energy sharing and pricing
- **Motivation and collaboration**
- Grid capacity and openness
- Procedural and administration issues
- Funding and business models

Solutions – PED ...

Milan Air and Climate Plan 2030: our vision

01. **Healthy and Inclusive Milan:** a healthier, safer and more equitable City
02. **Connected and highly accessible Milan:** a well connected and flexible City, with smooth and sustainable mobility
03. **Positive Energy Milan:** a City that consumes less and consumes energy better
04. **Cool Milan:** a greener city, cooler and liveable, which adapts to climate change
05. **Aware Citizens:** a City which adopts an aware and sustainable lifestyle

A City that consumes less and consumes energy better

Vision 2050:

Creation of a Carbon Neutral City

Goal 2030:

- Reduction of 50 % CO₂ emissions by 2030 related to public buildings
- Definition of a strategy for the efficiency of electrical uses in the tertiary sector
- Carbon Neutral Urban Regeneration projects

- Identification of a strategy for a new thermal energy production and to accelerate the deep energy renovation of private buildings
- Develop an efficient district heating grid
- Advance use of renewable sources through agreements for the development of energy communities

Positive Energy Milan

Why are we here

Our challenges

- Net zero carbon
- Ensure enough local REN for increasing demand
- Reduce heating/ cooling demand through retrofitting
- Promote a district approach and work with partners
- Rules for local energy systems vs (expanding) district heating

What we would like to learn

- How to activate finance
 - Procedural receipts
 - Regulatory mechanisms
- Setting up energy trading platforms

CITY OF PULA

MAIN CHALLENGES:

- State law
- Tourism oriented investors
- Citizen engagement

Net Zero Mission City

R Z E S Z Ó W

Comune
di Udine

PAESC duemila30

Patto dei Sindaci
per il Clima e l'Energia
EUROPA

Patto dei Sindaci per il Clima e l'Energia.

Dal 2009 il comune di Udine aderisce al Patto dei Sindaci per il Clima e l'Energia dell'UE, impegnandosi ad adottare misure e implementare azioni che mitigano le emissioni antropiche dei gas a effetto serra in atmosfera e adattano il territorio agli impatti del cambiamento climatico.

“Get involved” session: Replication of solutions & processes

+CITYXCHANGE

'Get Involved' Session

Replication of solutions & processes

+CITYXCHANGE

What to expect in this session?

Part 1: Introduction

Scalable Cities: two expert presentations
Replication beyond +CityxChange, the Italian case

Part 2: Storytelling

7 inspirational stories from cities

+CITYXCHANGE

Part 1: Introduction

+CITYXCHANGE

Scalable Cities: Identify and promote energy solutions and business models that can be scaled up and replicated across Europe and lead to measurable outcomes.

The **Task Groups** bring together practitioners to work on issues related to smart cities.

- Task Group Replication, led by Sara Rueda Raya
- Task Group Business Models & Finance, led by Philippe Fournand

The **Experts Group** offers technical advice to support the work of Scalable Cities.

+CITYXCHANGE

Scalable Cities

Innovative Smart City Business Models and Financing Schemes- Assessment

TG BM “Get Involved”

05th October 2023

Damian Wagner-Herold | Andrea Geyer Scholz

Funded by the   European
Commission

Expert Team BM

Damian Wagner-Herold

- Urban Innovation Advisor | Manager | Lecturer | Matchmaker | Entrepreneur
- Expertise: Smart City Expert 10 yrs +, Energy & Mobility, Digital Solution, former SCC1 Coordinator
- Scope: Innovation Eco-Systems & Implementation Management, Matchmaking
- Role: Lead Expert & Coordination, Assessment of cases/solutions;

Expert Team BM

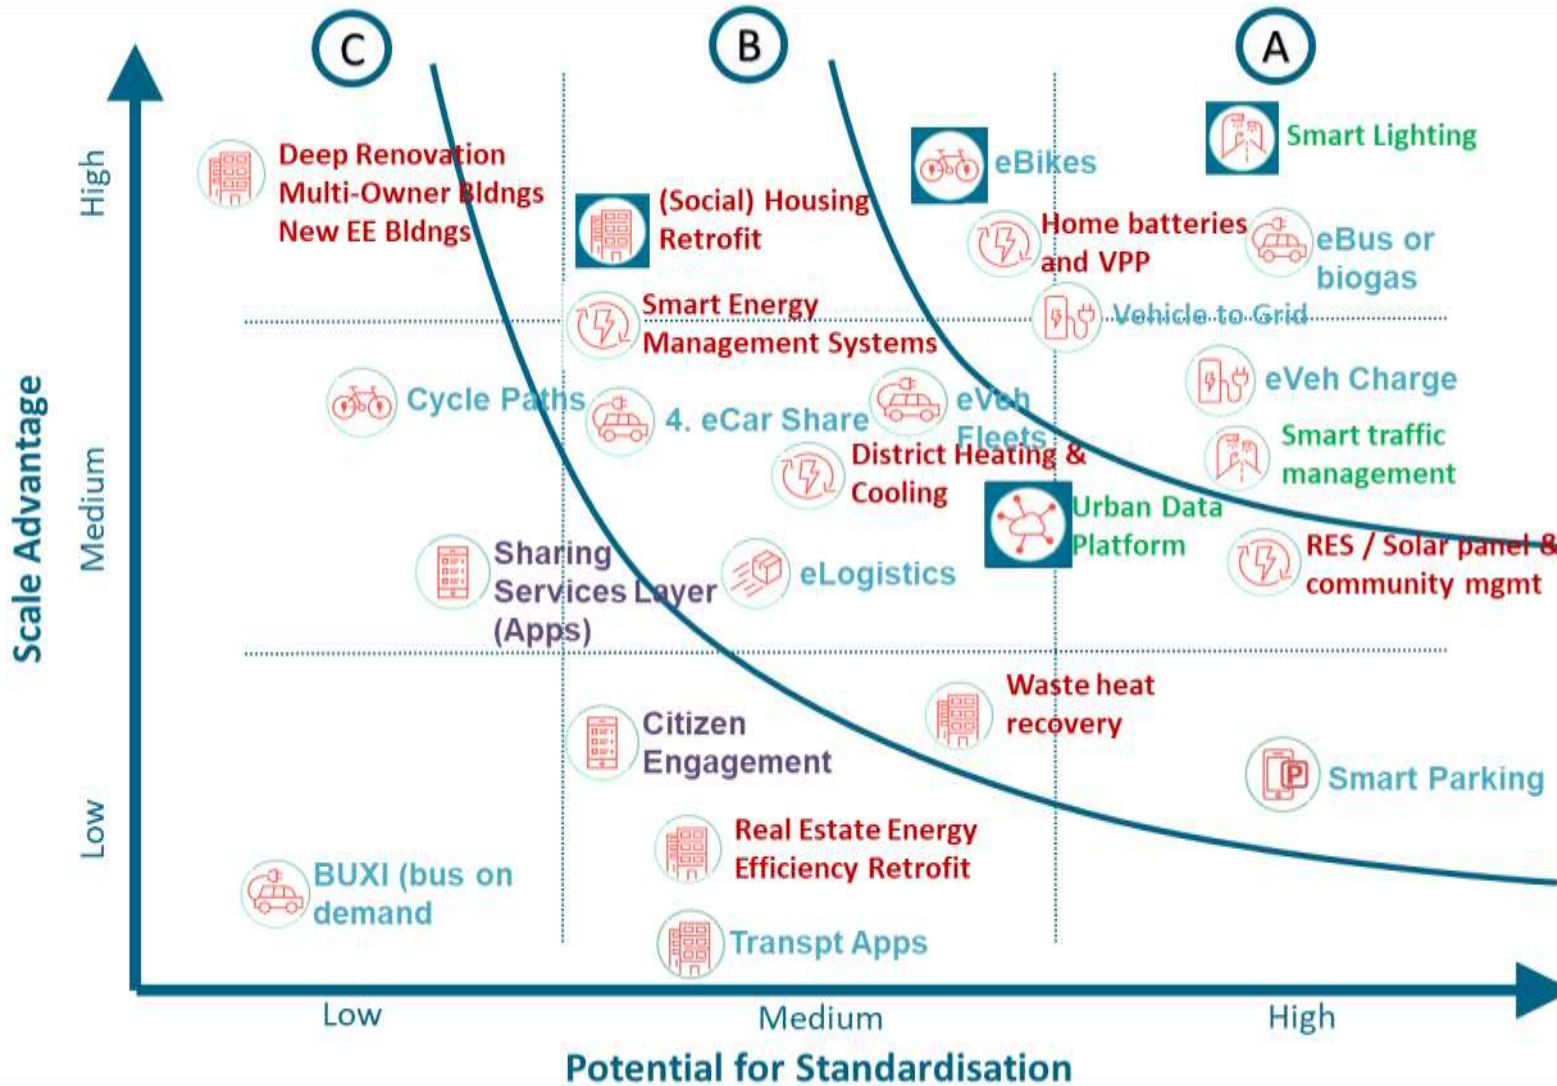

Andrea Geyer Scholz

- MD Smart Cities Consulting GmbH
- Background: Economics, Business Administration, Business Informatics
- Scope: Innovation development and management
- Role: Oversee and conduct survey; map results with relevant EU mission concepts and related programs; oversee digital outputs
- Expertise: Digitalization (processes, digital economy); H2020 evaluation expert; climate services; business model design

Scaling up: Elephant in the room since 2014

Learnings & first conclusions...

BM's are the elephant in the room....are they?

- ✘ Very limited and no feedback
- ✘ Little financial data/info available
- ✘ Cities have little understanding & focus on BM's they need to „operate“ (& finance)
- 🦒 Some „cases/solutions“ may be described as **operating models** (city perspective) rather than business models (private sector/profits)
- 👉 Follow-up „shortcut“ with BM-Owners (face-to-face Trondheim)
- 👉 In case of no/little information **focus on operating approaches** as minimum level of replicable information
- 👉 Dataset will be produced and shared

Scalable Cities

Task Group Replication 'Smart City Replication Strategies' +CityxChange Final Conference Scalable Cities Secretariat

4 – 5 October 2023

Trondheim NO

Funded by the

Co-Chair	Willem van Winden	w.van.winden@hva.nl	Atelier
Vice-Chair:	Sander Smit	sander.smit@r2msolution.com	+CityxChange
Members and assets:	LHCs (replication managers of lighthouse projects)		
Type of Task Group¹:	Support Task group		
Format:	5 meetings per year (2h duration) + 4 co-organised with CCG (2h duration) – meetings will take place online and if possible, in person during joint live events.		
Scope of activities:	Dissemination and knowledge exchange		

Funded by the

What is the goal of the study?

- Develop a common **replication evaluation framework**, capture the effectiveness of the **SCC upscaling strategies**, and empower the Task Group to **further replication** with its stakeholders.

How will this be done?

- Identifying **the core dimensions** driving and hindering replication of innovative solutions in cities and analysing **how replication has unfolded for the 18 SCC projects**.

How is the target group?

- **Replication managers – LHCs and FCs**

Expert Team leading the study

Nikita Shetty

- **Senior Strategy Consultant** in Smart Cities and Regions at BABLE & UK and Ireland lead with over 8 years of experience in multi-stakeholder, cross-sectoral project management;
- Holds a joint master's degree in

Alexander Schmidt

- **Founder and CEO** of BABLE with over 7 years of experience leading research in Smart Cities
- Holds two bachelor's degrees in environmental engineering and business administration, as well as a Master's in transport engineering;

Funded by the

Research Approach

Surveying and desk research to characterize the 18 SCC projects replication strategies

- Analysis of the 18 SCC01 replication strategies
- Exploration of replication drivers and barriers, trends and correlations
- Identifying trends in replication and upscaling conditions
- Characterise the role of the follower/fellow cities

1-to-1 interviews with SCC01 project LHCs and FCs

- Validation of surveying insights
- Collection of best practices and lessons learned

Replication within +CityxChange

+CITYXCHANGE

Replication beyond +CityxChange

+CITYXCHANGE

Replication on Italian Cities

- Starting from EU 100 Cities Mission who need tools (Milano, Roma, Bologna, Padova already involved, others in discussion)
- Building on top of other EU projects (e.g. Bologna and H2020 project GRETA - GReen Energy Transition Actions)
- Not only technical work but also local University involvement (University of Bologna, University of Roma 3...) including capacity building
- Leveraging Scalable cities Action Grant programme (+PADOVAXCHANGE selezionata to start soon)
- Working at different city scale (including also small towns like Crispiano and the sustainable cities network)

DD/MM/2YYY

Italian Cities Overview of work on PEB

Bologna

Area: 140,86 km²
Inhabitants: 388 171

Buildings: 1080
Area: 7 750 218 m²
Inhabitants: ~ 23 000

- geoJSON file containing:
 - Number of floors
 - Year of construction
 - Building Type
 - Installed PV Capacity

Milano

Area: 181,67 km²
Inhabitants: 1 361 908

Buildings: 31
Area: 50 132 m²
Inhabitants: 97 841

- iCD model with this information:
 - Building Type
 - Year of construction
 - Envelope description & U_{value}
 - HVAC & DHW system

Roma

Area: 1 287,36 km²
Inhabitants: 2 746 639

Buildings: 155
Area: ~ 660 696 m²
Inhabitants: ~7610

- GIS file containing:
 - Building Type
 - Number of floors
 - Roof Type
 - Potential roof area for PV

Udine

Area: 57,17 km²
Inhabitants: 97 841

Buildings: 10 (2 Schools, 1 Shopping mall, 7 Apartment blocks)
Area: 134 400 m²
Inhabitants: ~1000 (405 Apartments)

- Building's plans and sections
- Technical reports of the interventions
- Buildings' Energy Performance Certificates

Crispiano

Area: ~ 111 km²
Inhabitants: 13 770

Buildings: 7 (1 municipal building, 1 library, 2 schools, 2 offices, 1 sport center)
Area: ~ 16 000 m²
Occupancy: ~750 people/day

- Building plans, survey reports, and energy requalification projects holding:
 - Boulding geometry
 - Envelope description
 - Building type, Construction year

Bologna

Pilastro-Roveri is the area studied in the Greta EU project, Green Energy Transition Actions. The intent was to make Pilastro - Roveri area an area pioneering the process of climate neutrality that cities and citizens are called to undertake by 2030.

Bologna: 140, 86 km²

Inhabitants: 388 171

Specific area of interest: 1080 Buildings (7 750 218,48 m²)

Inhabitants: around 23 000

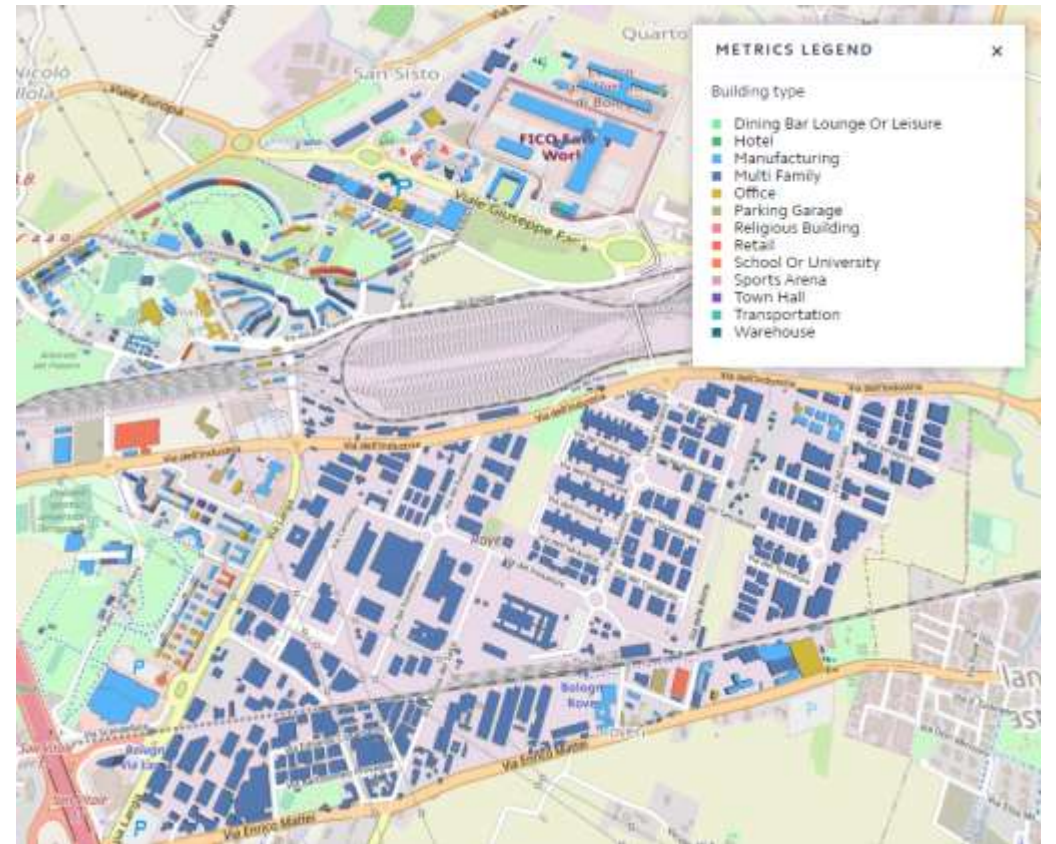

Bologna – Neighborhood Pilastro Roveri
